SUMMARY

AI engineer with math + systems background, 2 years going from data infra to production LLM systems — harness around the model, RAG, and evals that close the loop. MS @ UIUC. Shipped at top venture-backed startups and Fortune 500 enterprises.

EDUCATION

University of Illinois Urbana Champaign, M.S. in Information Sciences Aug 2024 – May 2026

GPA 3.86/4.0 · Distributed Systems & Database Systems & Applied Machine Learning · U.S. News #1 Information Systems

Shenzhen University, B.S. in Mathematics Sep 2019 – Jun 2023

GPA 3.79/4.50 (Top 10 %) · 2 merit scholarships · 4 national awards in ML modeling (supply-chain, finance, computer-vision)

WORK EXPERIENCE

Beckman Institute for Advanced Science and Technology Mar 2026 – May 2026

AI Engineer & Graduate Researcher Urbana, IL

- Architected multi-agent system with tool schemas via OpenAI function-calling on a Neo4j-backed closed-loop pipeline
- Engineered DSPy GEPA optimizer reflectively rewriting extraction prompts, lifting edge-direction accuracy 72%→86%
- Built a GraphRAG pipeline: LLM-extracted typed edges, cycle-detection validation, prereq-chain subgraph retrieval
- Engineered persistent learner memory with cross-session mastery state, grounding generation on evolving user knowledge

H60 Consulting (via UIUC Business Intelligence Group) Aug 2025 – May 2026

AI Engineer & Capstone Project Lead Remote · Chicago HQ

- Led a 10-person team delivering a flagship RAG copilot for a global airline from ambiguous requirements to production
- Built query-rewrite layer mapping user phrasing to domain vocabulary, lifting weak queries above the retrieval threshold
- Optimized retrieval layer (hybrid BM25+Pinecone vector search, structure-aware chunking), lifting top-5 hit rate to 88%
- Authored a deterministic locator/evidence/refusal gate atop an LLM-judge eval; prompt fixes lifted citation accuracy 60%

Donut Labs Jun 2025 – Aug 2025

Software Engineer Intern (Agent) – Sequoia-backed crypto agent for pro trader Remote · NYC HQ

- Re-architected 50+ agent tools into MCP search/execute meta-tools backed by vector retrieval, raising task success 22%
- Hardened the agent with defense-in-depth guardrails, gating 100% of high-risk actions before any irreversible execution
- Built a write-back data flywheel over a BERT classifier, semantic cache, and LLM fallback, cutting inference cost 86%

Sonic SVM Mar 2023 – Jul 2024

Software Engineer, Data Infra – Bitkraft-backed SaaS for game studios Shenzhen

- Launched a self-service analytics platform on GCP with Looker, enabling product teams to answer 80% of data questions
- Scaled data ingestion 10x using Kafka & Spark jobs to support 200% user growth and international product expansion
- Built monitoring with Prometheus & Grafana, reducing critical data incident response time from hours to under 5 minutes

Baidu Apr 2022 – Jul 2022

Software Engineer, ML Intern – Premier AdTech Platform with 10,000+ Global Partners Shenzhen

- Drove 3x ad revenue growth to \$200K/month in 3 months by optimizing traffic arbitrage for emerging publisher clients
- Conceived 4+ AB testings across user lifecycle to supercharge AARRR metrics, boosting daily new user 1.5x in 1 month

Tencent Nov 2020 – May 2021

Technical Product Manager Intern – The largest WeChat ecosystem platform for universities Shenzhen

- Drove the full SDLC for campus app, mitigating risks and unblocking dependencies to launch from scratch in 12 weeks
- Translated product requirements into technical specifications for a real-time notification system serving 50k+ students

SKILLS

Languages & Frameworks Python, TypeScript/JavaScript, Go, SQL, Rust, Next.js, Tailwind, HTML, CSS, Bash/Shell

Infrastructure & Data AWS (EC2/S3/Lambda), Docker, Kubernetes, Terraform, PostgreSQL, Redis

AI & LLMOps LangSmith, SageMaker, LangGraph, PyTorch, LoRA/fine-tuning, Prompt Engineering
